

Newspaper Printing Plate

Printing newspapers puts heavy demands on plates: they need to be quick to make and must deliver consistent quality right through long print runs.

HC newspaper plates provide wide imaging and processing latitudes giving repeatable, dependable printed results, to produce the best possible performance on newspaper presses – without compromise.

The Structure of Newspaper Printing Plate:

The Features of Newspaper Printing Plate:

High productivity

Newspaper printing plates use high sensitive coatings for increased productivity and imaging latitude.

Flexible processing

Newspaper plates have a wide processing latitude and can typically be developed in processors already installed on site, which saves money and increases flexibility.

Consistent image quality

Newspaper plates coating technology offers wide exposure latitude and stable dot on press.

Better chemistry saves time

Not only do developers work longer, but processors are easier to clean, which means fewer man-hours cleaning processors and disposing of spent chemicals.

Easy handling

The range of dedicated newspaper plates has advanced handling performance.

The Application of Newspaper Printing Plate:

The offset printing plate produced by our company is compatible with all mainstream newspaper

press in the market, and is widely used in newspaper printing.

The packaging of Newspaper Printing Plate:

Two coated sides are placed facing each other, separated by neutral backing paper in the middle, the outside is covered with plastic lined black kraft paper and placed in the carton box,each carton box is loaded around 50 -100 pieces. Loaded carton boxes on the wooden pallet protected with wooden frames or cardboard. Finally, wrap it with kraft paper or plastic film and tighten by plastic tapes.
